ANNUAL REPORT  
 2023

#Israel is under attack

23 Years of activity and support  
 for victims of terrorism

**Dear Beloved Family,**

The final months of 2023 brought the largest death toll of Jews in one day and suffering to the people of Israel. On the day of October 7th alone, over 1,200 mostly young people, were murdered in a surprise POGROM by marauding, blood thirsty terrorists and civilians from Gaza, who invaded Israel's South; the largest death toll of Jews in a one day since the Holocaust ended 80 years ago. Many were raped and tortured before they were murdered and dismembered.

As the longest-standing organization in Israel dedicated to caring for the victims of terror and war in Israel, OneFamily feels the immense weight of this dramatically expanded responsibility.

The therapeutic, emotional and experiential knowledge that we have acquired over the past 23 years has prepared us to assist the newly bereaved parents, siblings, orphans of one or both parents, widows, parents of the widows, grandparents, twin siblings who lost their twin, the wounded and the families of the wounded.

I want to thank our dedicated team, both seasoned and newly expanded, who have worked tirelessly since October 7th, offering a wide range of services including, therapeutic retreats, financial assistance, support groups, healing camps for youngster, overseas retreats for the bereaved and the traumatized, Government rights maximization and more.

I want to thank our loyal and generous donors from around the world who have enabled us to continue providing all of the compassionate care that Israel's Victims of Terror have come to know, to long for and to be grateful for.

To the newly bereaved families I extend my deepest heartfelt condolences.

To the injured, we pray for your swift recovery.

To the hostages, we are all praying for your immediate return to the loving embrace of your families.

Together, let us hope and pray for a world of peace between all mankind.

Marc Belzberg  
Chairman, OneFamily
